

UNITED STATES DISTRICT COURT  
FOR THE NORTHERN DISTRICT OF CALIFORNIA  
OAKLAND DIVISION

LARGAN PRECISION CO., Ltd.,

Case No: C 10-01318 SBA

Plaintiff,

VS.

FUJIFILM CORPORATION,

# ORDER RE CLAIMS CONSTRUCTION

Defendant.

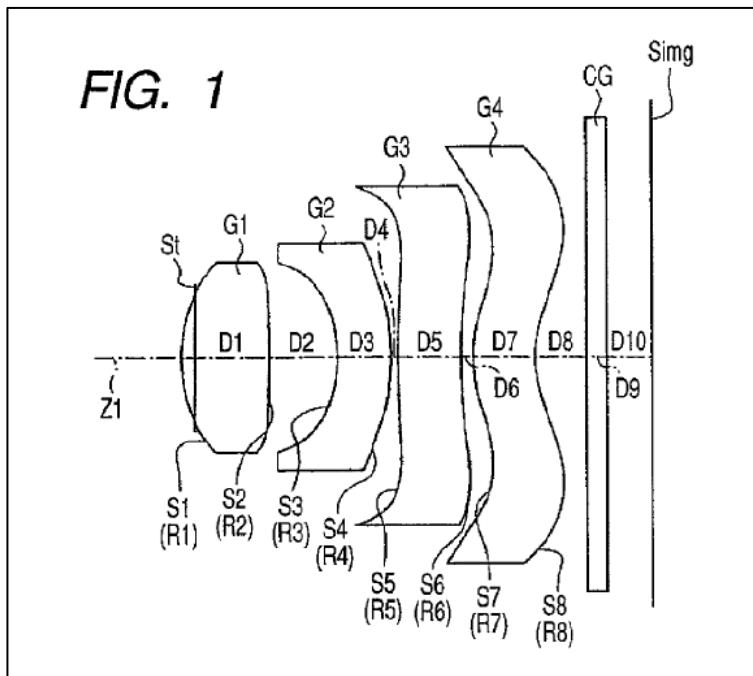

## AND COUNTERCLAIMS.

Patentee Fujifilm, a manufacturer and seller of optical lenses, holds the rights to U.S. Patent Nos. 7,535,658 (“the ‘658 patent”) and 7,453,654 (“the ‘654 patent”). These patents disclose optical lens configurations suitable for use in cellular telephone cameras. Largan Precision Company, Ltd. (“Largan”) brings the instant declaratory relief action seeking a judicial determination that certain of its products do not infringe either of Fujifilm’s patents. In turn, Fujifilm has counterclaimed for patent infringement. The Court has original jurisdiction over the action pursuant to 28 U.S.C. § 1331.

The parties are presently before the Court requesting that it construe the terms which appear in four of the claims contained in the ‘658 patent: (1) “resin material”; and (2) “air distance.” At the claims construction hearing, the Court recited its tentative decision regarding the construction of “air distance,” and directed the parties to submit proposed constructions consistent with the Court’s findings as to that term. As to “resin material,” the Court directed the parties to submit supplemental briefing, which has been timely filed by both parties. Based on the arguments presented by the parties in Court and in their respective papers, the Court construes those terms below.

1 **I. BACKGROUND**2 **A. THE '658 PATENT**

3 The '658 patent describes an imaging lens configuration designed for "high imaging  
 4 performance" in a compact configuration. First McCutcheon Decl. Ex. 1 ("'658 Patent") at  
 5 col.2, ll.15-18, Dkt. 56-1. The '658 patent's nine drawings each depict a configuration of  
 6 four individual lenses that together form the patented lens assembly. *Id.* at figs.1-9. Figure  
 7 One, reproduced below, shows an exemplary embodiment of the invention (one of the nine  
 8 preferred embodiments shown in the '658 patent).

9  
10 **FIG. 1**

21  
 22 *Id.* at fig.1. The configuration has four lenses—G1, G2, G3, and G4—labeled in increasing  
 23 order as the distance increases from the object being imaged, which would be placed to the  
 24 left of the lenses in the above exemplary drawing. Each lens in the drawing has an object-  
 25 side surface facing left and an image-side surface facing right. *Id.* at col.5, ll.36-41. The  
 26 surfaces are labeled sequentially S1 through S8 as the distance increases from the object  
 27 being imaged. *Id.* at fig.1. Spacing on the optical axis (Z1) between any surface (Si) and  
 28 any adjacent surface ( $Si \pm 1$ ) is labeled with D1 through D10. *Id.* at col.5, ll.42-44.

1                   **B. PATENT PROSECUTION HISTORY**

2                   The parties do not dispute that the meaning of “resin material” to one skilled in the  
 3 art of lens-making ordinarily *includes plastics*. See Fujifilm Br. at 5; Largan Br. at 7; Supp.  
 4 Largan Br. at 1. Nonetheless, Largan’s principal contention regarding the term “resin  
 5 material” is that Fujifilm allegedly disavowed the use of plastics during the patent  
 6 prosecution proceedings pertaining to the ‘658 patent in order to overcome the patent  
 7 examiner’s initial rejection of the patent claims.

8                   **1. PTO Office Action**

9                   On August 19, 2008, the PTO issued its Office Action in which it initially rejected  
 10 the claims in the ’658 application. See First McCutcheon Decl. Ex. 4 (“Prosecution  
 11 History”) at FC-L00014229, Dkt. 56-4.<sup>1</sup> First, the patent examiner stated that, “Claims 1,  
 12 5, 8 and 10 are rejected under 35 U.S.C. [§] 102(e) as being anticipated by Shinohara (U.S.  
 13 Patent No. 7,345,830).” Id. at FC-L00014230. More specifically, the examiner found that  
 14 Shinohara teaches all of the claimed limitations disclosed in each of the aforementioned  
 15 claims. Id. at FC-L00014230 to -L00014231. In addition, the examiner rejected claim 9  
 16 on obviousness grounds under 35 U.S.C. § 103(a), again based on Shinohara. Id. at FC-  
 17 L00014231. The examiner stated:

18                   Shinohara teaches all of the claimed limitations of the instant  
 19 invention as outlined above with respect to claim 1, but fails to  
 20 explicitly teach wherein each of the second to fourth lenses are  
 21 made from a resin material. However, Shinohara does teach the  
 22 substitution of a plastic material for glass as the lens material  
 23 (column 6, lines 46-48) such that *it would have been obvious to  
 24 one of ordinary skill in the art at the time the invention was  
 25 made to use a plastic material as taught by Shinohara for  
 26 construction of the second to fourth lenses in the imaging lens  
 27 for cost reduction.*

---

28                   <sup>1</sup> Under 35 U.S.C § 102(a), a patent may be anticipated, and hence, invalid, if the  
 29 claimed invention was described in a printed publication “before the invention thereof by  
 30 the applicant for patent.” If the requirements for an anticipation defense are not satisfied,  
 31 obviousness provides another basis for invalidating a patent. 35 U.S.C. § 103(a). A patent  
 32 is invalid for obviousness “if the differences between the subject matter sought to be  
 33 patented and the prior art are such that the subject matter as a whole would have been  
 34 obvious at the time the invention was made to a person having ordinary skill in the art to  
 35 which said subject matter pertains.” Id.

1 Id. at FC- L00014231 to -L00014232 (emphasis added).<sup>2</sup>

2 **2. Fujifilm's Response**

3 On December 19, 2008, Fujifilm submitted a Reply to the Office Action of August  
 4 19, 2008 (“Reply”). In response to the rejection of claim 9 as being obvious and hence  
 5 “unpatentable over Shinohara,” Fujifilm argued that “the Examiner has failed to establish a  
 6 *prima facie* case of obviousness.” Id. at FC-L00014213. In addition, Fujifilm noted that  
 7 claim 1 had been amended to include claim 9, and that claim 9 had been cancelled. Id.

8 To address the examiner’s rejection of claims 1, 5, 8 and 10 as anticipated by  
 9 Shinohara, Fujifilm cancelled claim 9 and incorporated claim 9 into claim 1 “to recite that  
 10 each of the second through fourth lenses is made of a resin material.” Id. at FC-  
 11 L00014212.<sup>3</sup> In that regard, Fujifilm noted: “Resin material is not mentioned in  
 12 Shinohara. Hence, Shinohara does not disclose a lens made of a resin material. ¶¶  
 13 Therefore, Shinohara fails to teach all of the elements for amended claim 1.” Id.  
 14 According to Largan, Fujifilm’s representations that Shinohara does not mention resin  
 15 material and does not disclose the use of a lens made of resin material demonstrate that  
 16 Fujifilm necessarily excluded plastic from the definition of “resin material.” Largan Br. at  
 17 7-9.

18 **C. PROCEDURAL HISTORY**

19 Beginning in 2007, Fujifilm began suing cell phone manufacturers whose phones  
 20 use Largan lenses, alleging that such lenses violate Fujifilm’s patents. Compl. ¶¶ 9-12. On  
 21 March 29, 2010, Largan filed the present civil action seeking a declaratory judgment that  
 22 the ’654 and ’658 patents are unenforceable. Id. ¶ 28, 33. Fujifilm answered and  
 23 counterclaimed on May 24, 2010. Answer, Dkt. 13. Fujifilm’s counterclaims allege  
 24 infringement of the ’654 and ’658 patents by Largan, and assert that both patents are valid

---

25 <sup>2</sup> Shinohara’s specification mentions that “[c]lost *can* be further curtailed by means  
 26 of forming the lens from a plastic material.” See Engle Decl. Ex. 5 (“Shinohara”) at col.6,  
 ll.46-48, Dkt. 106-5 (emphasis added).

27 <sup>3</sup> Originally, only claim 9 included the “resin material” limitation for the second,  
 28 third, and fourth lenses. See Prosecution History at FC-L00014392 to -L00014395.

1 and enforceable. Id. During the pendency of this action, Largan also instituted an *inter*  
 2 *partes* reexamination proceeding before the USPTO attempting to invalidate the '658  
 3 patent. See First McCutcheon Decl. Ex. 8, Dkt. 56-8. In the pending USPTO proceeding,  
 4 Largan argues that prior arts disclose both the "resin material" and "air distance"  
 5 limitations found in the '658 patent. Id.

6 On October 27, 2011, the Court held a claims construction hearing to construe the  
 7 terms "resin material" and "air distance." The following table sets forth the parties'  
 8 proposed constructions:

9 <b>Term, Phrase, or Clause</b>	10 <b>Fujifilm's Construction</b>	11 <b>Largan's Construction</b>
12 "resin material"	13 "materials that include resin-like polymers or plastics"	14 "materials having physical properties of synthetic or natural polymers, <i>excluding plastic material</i> "
15 "air distance"	16 "two lenses are separated such that an air space exists between them"	17 "a gap between two immediately adjacent lenses, such that the corresponding lens surfaces are <i>not in physical contact</i> "

18 Id. at 3 (emphasis added).

19 With regard to the term "air distance," Largan's took the position that there can be  
 20 no air distance between the lenses if the two lenses are in contact with one another—such  
 21 as the case where the lenses touch each other at the periphery. At the claims construction  
 22 hearing, however, the Court rejected Largan's contention and concluded that the mere fact  
 23 that the lenses touch one another did not foreclose the existence of an air distance between  
 24 them. Nevertheless, the Court found that Fujifilm's proposed construction was ambiguous  
 25 as to physical contact, and ordered the parties to propose a construction resolving this  
 26 ambiguity consistent with its ruling.

27 As to the term "resin material," Fujifilm claims that it includes plastics. Largan  
 28 acknowledges that resin material typically encompasses plastics, but contends that Fujifilm  
 disclaimed the use of plastic based on representations it purportedly made to the United  
 States Patent and Trademark Office ("PTO") during the patent prosecution process. At the

1 close of the claims construction hearing, the Court ordered the parties to submit  
 2 supplemental briefing on this particular issue.

3 **II. DISCUSSION**

4 **A. “AIR DISTANCE”**

5 The parties have submitted revised, proposed constructions of the term “air  
 6 distance,” taking into account the Court’s rejection of Largan’s contention that no “air  
 7 distance” can exist if the lenses are in physical contact with one another. The parties now  
 8 offer the competing constructions, as follows:

Fujifilm’s Construction	Largan’s Construction
“An air space between two lenses wherein the lenses may or may not be in physical contact with each other.”	“A space of air between at least one point on the image-side surface of the first lens and at least one point on the object-side surface of the second lens, such that the other points on the lens surfaces may or may not be in physical contact.”

15 The Court finds that these constructions are substantially similar. Of the two  
 16 proposals, however, Largan’s more accurately reflects the Court’s ruling. Accordingly, the  
 17 Court adopts Largan’s proposed construction, as set forth above.

18 **B. “RESIN MATERIAL”**

19 **1. Evidentiary Issue**

20 Before turning to the merits of the parties’ respective, proposed construction of  
 21 “resin material,” the Court must first address their dispute regarding the expert declaration  
 22 from Dr. Duncan T. Moore which Largan submitted along with its supplemental claim  
 23 construction brief. Moore Decl., Dkt. 126. Fujifilm objects to the Court’s consideration of  
 24 Dr. Moore’s declaration on the grounds that he was not previously disclosed by Largan as  
 25 an expert for purposes of claims construction. Reply at 1-2, Dkt. 128.

26 Patent Local Rule 4-3 requires the parties to disclose in their Joint Claims  
 27 Construction Statement (“Joint Statement”) the identity of expert witnesses, as well as a  
 28

1 summary of the expert's opinion. Here, Largan disclosed one expert in the Joint  
 2 Statement—Dr. Richard G. Zech. Joint Statement at 4, Dkt. 37. Although Largan noted  
 3 that it “may call one *or more* experts,” see id. (emphasis added), Largan never sought to  
 4 amend its disclosure to identify Dr. Moore and to provide a summary of his proposed  
 5 opinions. In light of Largan’s failure to comply with the Patent Local Rules, coupled with  
 6 the inherent prejudice to Fujifilm resulting from this untimely disclosure, the Court  
 7 exercises its discretion and declines to consider Dr. Moore’s declaration. See Tri-Valley  
 8 CARES v. U.S. Dept. of Energy, 671 F.3d 1113, 1131 (9th Cir. 2012) (court has discretion  
 9 to disregard request which does not comply with the local rules).

10 **2. Analysis**

11 Federal courts must “indulge a ‘heavy presumption’ that claim terms carry their full  
 12 ordinary and customary meaning[.]” Omega Eng’g, Inc, v. Raytek Corp., 334 F.3d 1314,  
 13 1323 (Fed. Cir. 2003) (citations omitted). Under the doctrine of prosecution disclaimer,  
 14 however, representations made during the patent prosecution process may circumscribe the  
 15 ordinary meaning of a claim if the patentee makes a “*clear and unmistakable* disavowal of  
 16 scope during prosecution.” Purdue Pharma L.P. v. Endo Pharm. Inc., 438 F.3d 1123, 1136  
 17 (Fed. Cir. 2006) (emphasis added); Omega Eng’g, 334 F.3d at 1323 (prosecution disclaimer  
 18 doctrine applies only if “the patentee *unequivocally* imparted a novel meaning to those  
 19 terms or expressly relinquished claim scope during prosecution”) (citations omitted).  
 20 Where the alleged disavowal is ambiguous, however, the Court should decline to apply the  
 21 doctrine. Omega Eng’g, Inc., 334 F.3d at 1323 (citing cases). To determine whether  
 22 statements to the PTO constitute an unequivocal disavowal, the court must consider the  
 23 context in which the statements were made and not review the statements in isolation. See  
 24 Elbex Video, Ltd. v. Sensormatic Elecs. Corp., 508 F.3d 1366, 1372 (Fed. Cir. 2007).

25 Largan argues that Shinohara disclosed the use of plastic, and that in an effort to  
 26 distinguish the ‘658 patent from Shinohara, Fujifilm “unequivocally and unambiguously  
 27 disclaimed plastic as a resin material.” Largan Supp. Br. at 1, Dkt. 124. In particular,  
 28 Largan points to Fujifilm’s statement—“*Resin material is not mentioned in Shinohara.*

1 *Hence, Shinohara does not disclose a lens made of a resin material*”—as an alleged  
2 disclaimer of plastic. The Court disagrees. Fujifilm rendered the foregoing statement in  
3 response to the patent examiner’s determination that claims 1, 5, 8 and 10 of the ‘658 patent  
4 were *anticipated* by Shinohara. Under the doctrine of anticipation, a patent is invalid if  
5 “*each and every limitation* is found either expressly or inherently in a single prior art  
6 reference.” Sanofi-Synthelabo v. Apotex, Inc., 470 F.3d 1368, 1375 (Fed. Cir. 2006)  
7 (emphasis added). Thus, to distinguish its patent claims from Shinohara, and hence, avoid  
8 anticipation, Fujifilm amended claim 1 to recite that “each of the second to fourth lenses is  
9 made of a *resin material*.” Prosecution History at FC-L00014212. It was in that specific  
10 context that Fujifilm then *accurately* pointed out that Shinohara does not disclose, let alone  
11 mention, lenses made of resin material. Given those circumstances, the Court is not  
12 persuaded that Fujifilm’s statement is “so clear as to show reasonable clarity and  
13 deliberateness, . . . and so unmistakable as to be unambiguous evidence of disclaimer” as to  
14 the use of plastic lenses. See Omega Eng’g, 334 F.3d at 1325 (citations omitted).

15 The Court’s determination that Fujifilm did not unequivocally and clearly disclaim  
16 the use of plastic in the ‘658 patent is further supported by Fujifilm’s response to the  
17 examiner’s *obviousness* finding. As noted, the patent examiner opined that although  
18 Shinohara did not teach the use of resin material for the four lenses, “it would have been  
19 obvious to one of ordinary skill in the art at the time the invention was made to use a plastic  
20 material as taught by Shinohara for construction of the second to fourth lenses in the  
21 imaging lens for cost reduction.” Prosecution History at FC-L00014231 to -L00014232. In  
22  
23  
24  
25  
26  
27  
28

1 response, Fujifilm did *not* argue that resin material does not include plastic.<sup>4</sup> Rather,  
 2 Fujifilm argued that Shinohara could not be a prior art reference for the purpose of an  
 3 obviousness rejection because both Shinohara and the '658 application were “owned by the  
 4 same person or subject to an obligation of assignment to the same person.” Prosecution  
 5 History at FC-L00014214 (citing 35 U.S.C. § 103(c)). In other words, Fujifilm did not  
 6 expressly address the question of whether Shinohara teaches the use of plastic lenses in lieu  
 7 of glass, since, from Fujifilm’s perspective, Shinohara was not a valid prior art reference  
 8 for purposes of an obviousness finding in the first instance.

9 In sum, Fujifilm’s statement regarding whether Shinohara mentions or discloses the  
 10 use of “resin material” is, at best, ambiguous, which is insufficient to trigger the doctrine of  
 11 prosecution disclaimer. Accordingly, the Court construes “resin material” as “materials  
 12 that include resin-like polymers or plastics.”

13 **III. CONCLUSION**

14 For the reasons stated above,

15 **IT IS HEREBY ORDERED THAT:**

16 1. The term “air distance” is construed to mean: “A space of air between at least  
 17 one point on the image-side surface of the first lens and at least one point on the object-side  
 18 surface of the second lens, such that the other points on the lens surfaces may or may not be  
 19 in physical contact.”

---

20

21 <sup>4</sup> Indeed, there was no need for Fujifilm to disclaim the use of plastic given that  
 22 Shinohara does not disclose or teach the use of resin material *or* plastic. In passing,  
 23 Shinohara merely mentions the use of plastic as a possible cost saving measure. As such,  
 24 the reference to plastic was purely aspirational; that is, what *could be* done and not what  
 25 was actually to be done. As a result, it is doubtful whether Shinohara’s passing reference  
 26 to plastic would be sufficient to support an anticipation finding. See Sanofi-Synthelabo v.  
Apotex, Inc., 550 F.3d 1075, 1082 (Fed. Cir. 2008) (“An anticipating reference must be  
 27 enabling; that is, the description must be such that a person of ordinary skill in the field of  
 28 the invention can practice the subject matter based on the reference, without undue  
 experimentation”); Godfrey L. Cabot, Inc. v. J.M. Huber Corp., 127 F.2d 805, 808 (5th Cir.  
 1942) (holding that a reference to the possible use of a limitation without sufficient  
 disclosure of how to proceed with the limitation was not a proper disclosure); **BLACK’S  
 LAW DICTIONARY** 532 (9th ed. 2009) (defining a patent disclosure as “[a] document  
 explaining how an invention works in sufficient detail for one skilled in the art to be able to  
 understand and duplicate the invention”).

1           2. The term "resin material" is construed to mean: "materials having physical  
2 properties of synthetic or natural polymers."

3           3. The parties shall appear for a telephonic Case Management Conference on  
4 **October 17, 2012 at 2:30 p.m.** Prior to the date scheduled for the conference, the parties  
5 shall meet and confer and prepare a joint Case Management Conference Statement which  
6 complies with the Standing Order for All Judges of the Northern District of California and  
7 the Standing Orders of this Court. Plaintiff Largan shall assume responsibility for filing the  
8 joint statement no less than seven (7) days prior to the conference date. Plaintiff's counsel  
9 is to set up the conference call with all the parties on the line and call chambers at (510)  
10 637-3559. NO PARTY SHALL CONTACT CHAMBERS DIRECTLY WITHOUT  
11 PRIOR AUTHORIZATION OF THE COURT.

12           IT IS SO ORDERED.

13 Dated: September 17, 2012
